SUMMARY

Front-end Architect with **11+** years building solid, scalable enterprise **Angular** platforms — **micro frontends**, **Nx monorepos**, design systems, and **SEO-ready SSR/SSG** sites. Proven track record delivering performant, multilingual products used by global teams.

SKILLS

Highly skilled in Angular, TypeScript, and enterprise front-end architecture. Proficient in HTML, CSS, and JavaScript, with a focus on design systems, performance, and accessible, responsive interfaces.

- Built high-performance, micro-frontend, API-integrated platforms in Nx monorepos using Module Federation.
- Worked on migration from AngularJS to modern Angular.
- Design systems and Storybook; in-depth use of Bootstrap, Material, and shared UI foundations.
- SSR/SSG and technical SEO for crawlable pages with a fast first paint.
- Complex features: Web workers, SignalR notifications, large-dataset rendering, and splitting a micro-frontend out of an Nx monorepo.
- Daily with Cursor and agentic coding to accelerate architecture and fullstack delivery — a tool alongside the Angular platform work, not the headline skill.

WORK EXPERIENCE

AUG-2024 | Mimecast | Current (2 years) - Working as **Senior Software Engineer**.

- Building a next-gen email security platform across multiple products on Angular micro frontends in an Nx monorepo.
- Platform-team work with principal and senior engineers — shared libraries and monorepo foundations.
- Created core components on Storybook for other teams to reuse.
- Migrated a legacy AngularJS app to Angular 18.

JUN-2019 | Enate | 5 years - **Product Engineer**, later tech lead for a micro-frontend product.

- One of two tech leads for a 4-person front-end team on the main product.
- Main product: 50k+ record tables, Outlook-like email, Web workers / SignalR, 9 languages.
- Supporting product: responsive end-user app, also 9 languages.

JUN-2015 | Mphasis | 4 years - Started as a **Software Engineer**.

- Started on JavaScript, then Angular 2 when it launched.
- Built FedEx Last Mile and H3D delivery apps — PWA, IVR, responsive, multilingual.
- Built Functionality Grid, a FedEx supply-chain dashboard with graphs, tables, and complex filtering.

ACHIEVEMENTS

MICROSOFT “INVITE-ONLY” HACKATHON EVENT – LONDON, UK.

Attended and completed an important project in an invite-only event by Microsoft, later incorporated the same project in our product.

See more details on this LinkedIn post.

APPRECIATION FROM COMPANY & CLIENTS

- Received appreciation from clients of the H3D driver app for increasing performance and loading efficiency by 50% using the implementation of lazy module loading and reducing the bundle size by 40%.
- Received “Summit Award June 2017” from Mphasis, for creating automation test bed that reduced the effort from 24 hours (8 hours x 3 resources) to One hour.
- Received “Summit Award October 2018” from Mphasis for contribution in H3D team. Received “Quarterly Apex Team Award” in Quarter-2, 2019.

EDUCATION

B.E. | 2011 - 2015 GM Institute of Technology, Davangere. Affiliated with VTU.
